

Bill page 1

The MPRN on your electricity bill is a unique number for the electricity supply at your address. You may be asked for this if you contact customer service.

This section of your bill includes your:

Your Energia customer account number.

Your tariff is the package you signed up for.

This is the date that this bill was issued.

The date that your payment is due.

This section of your bill includes your:

The balance on your account prior to the issue of this bill.

Your electricity charges for this billing period.

These are broken down on page two of the bill.

Your new account balance including this bill.

Bill page 2

Your units show you how many units of electricity you have used for each time band.

If you have meter readings shown, you will see your start and end meter reading followed by one of the letters below:

A = Actual meter read.

E = Estimated meter read.

CU = Customer meter read.

This shows the breakdown of units you have used in this billing period.

This is a combination of the fixed charges associated with providing electricity and gas services and a share of the supply costs in servicing your account.

.. The unit rate is the cost for each unit of energy used.
It depends on the time of day you used your energy.

If the abbreviation CR appears after a value, this means that you have a positive balance on your account.

This is your payment for what you have exported back to the grid. This appears as a credit on your bill and will show the unit rate and units exported here.

• This lists recent payments received and the balance of your account prior to this bill.

Mr. Murphy,
1 Main Street,
Any Town.

Your bill summary

Balance all previous bill	€75.66	CR = Credit
Payments received	€0.00	
A Account balance before this bill	€75.66	
B Transactions for this period	€0.02	
C New account balance (A+B)	€75.68	Amount due

Average daily use (units)

This period ☐

Same period last year ☐

This is the total number of units used divided by the number of days in the billing period and can help you monitor how much electricity you are using.

It is not always possible to provide this information and so 'not available' will sometimes appear. Actual and estimated meter readings are treated the same.

VAT Registration Number: IE 632 60350. Registered VAT Address: The Liberty Centre, Blanchardstown Retail Park, Dublin 15, D15 Y2ZH

Your previous bill remains unpaid. Failure to pay this could impact your credit rating. Please call our Customer Helpline to agree a suitable payment arrangement.

This bill contains your first Clean Export Guarantee payment. If you joined the scheme from 15 February 2022, this payment will be backdated. Future payments will be in The General Building, Blanchardstown Retail Park, Dublin 15, D15 Y2ZH enclosed or enērgia.ie

Balance at last bill	€75.66
Payment received	€0.00
Balance before this bill	€75.66

Useful information

A few things to know

Smart meters currently apply to electricity only. This means if you are a dual fuel customer your gas bill will stay the same.

Your smart bill may include different day, night or peak rates depending on the tariff you chose when you signed up.

Your first smart bill may look slightly different while your account updates.

What is a smart meter?

Smart meters automatically send meter readings to ESB Networks, helping reduce estimated bills and giving you a clearer view of your electricity usage.

What are smart tariffs?

Smart tariffs use different rates at different times of day, like day, night and peak times. This lets you choose a tariff that best suits your lifestyle and energy use. Find out more at energia.ie/energy-plans.

What is Energy Insights?

Energy Insights is a tool available through your online Energia account that helps you understand your electricity usage. It can break down when you use energy, estimate which appliances use the most and help you spot ways to save. Energy Insights is available on all smart products except the standard Smart Tariff.

How do smart meters support Microgeneration?

If you generate electricity at home through solar panels or other renewable technology, your smart meter can track the extra electricity you send back to the grid for Clean Export Guarantee (CEG) payments. Find out more at energia.ie/microgeneration.

Your smart bill, explained

A simple guide to reading your smart bill.

enérgia

Your first smart bill

Your smart meter gives you a clearer view of how and when you use electricity. That means your bills may look a little different from now on. This guide explains the key changes and what to expect from your first smart bill.

What are the benefits of smart meters?

- **Smarter data**
See how and when you use electricity across the day.
- **More accurate bills**
Automatic readings help reduce estimated bills and manual meter reads.
- **More ways to save**
You may be able to save more by shifting some usage to off-peak times on a smart tariff or EV charging plan.
- **Better for the planet**
Reduce energy waste with better insights and paperless billing.
